MASTER OF FINE ARTS: DESIGN AND TECHNOLOGY

Student Learning Outcomes

Students graduating from this program will:

- Interpret, collaborate, and develop ideas and abilities in practice.
- Construct and model graphic skills to communicate design ideas.
- Use discipline specific tools in design and production processes.
- Generate, organize, and integrate visual research, textual analysis, and material history.
- Prepare and plan entrepreneurial strategy towards a career in the live entertainment industry.
- Collaborate, combine, and synthesize design and technical skills through live production.

Program Requirements

The Master of Fine Arts: Design and Technology Emphasis is a three-year program requiring a minimum of 60 credit hours.

Students majoring in design and technology may choose to specialize in:

- Design (scenic design, costume design and technology, lighting design, sound design).
- Technical direction.
- Stage management.
